**Describe Animal Relationships at the Izaak Walton Park**

*SOL 3.5*

You will discover how food passes from plants to animals to other animals in a food chain.

1) What is a food chain?

---

---

2) Which animals hunt other animals for food? (Predators or prey?)

---

---

3) What living thing is at the beginning of a watershed food chain?

---

---

4) What happens if you change one part of the food chain?

---

---

5) Name 3 predators at the park that are also prey.

---

---

6) Why are plants at the beginning of food chains?

---

---

---

---
