## Understanding Diversity and Resources of Environments

*SOL 3.6*

You will find out how all living things use the things around them to live.

1) What is a **population**?

---

---

2) Is a **community** made up of different living things or one kind of living thing?

---

---

3) What are examples of **resources**?

---

---

---

4) What is **competition**?

---

---

---

5) When the resources in an ecosystem change, what gets affected?

---

---

---

---
